

# Deploy, scale, and manage your containerized application workloads

Deploy native Kubernetes clusters with the latest upstream versions on hardened master and worker nodes.

Create a cluster +

## Cluster capabilities

### Clusters

Automate deployments and manage your containerized apps in a native Kubernetes experience.

### Image registry

Safely store and share your Docker images with users in your IBM Cloud account.

### Vulnerability Advisor

Use status reports to protect your workloads and stop non-secure images from running.

## Daily use

### Create a cluster

After you've [installed the CLIs](#) for running Kubernetes commands and managing Docker images, you can create your first cluster! Be sure to specify the cluster configurations that fit your needs.

```
ibmcloud ks cluster create --location dal10 --public-vlan <public_vlan_id> --private-vlan <private_vlan_id> --machine-type b2c.4x16 --nodes 3 --n...
```

### Add a namespace to your registry

With the [registry plug-in](#) installed, you can create a namespace and push images to your private registry.

```
ibmcloud cr namespace-add <namespace_name>
```

Standard

## Infrastructure

Choose which network and compute environment to run your cluster on. [Learn more about the differences.](#)

### Classic

Run your cluster with native subnet and VLAN networking on our classic infrastructure.

### VPC

Create a fully customizable, software-defined virtual network with superior isolation using IBM Cloud VPC.

## Kubernetes version

Select the Kubernetes platform version for your cluster. For more information about versions, including links to the container platform community release notes, [see the docs](#).

Help

Log in to your cluster

Deploy your app

1. Set up your image registry  
Store your images in a registry that the cluster can access to run containers.

2. Deploy your app  
Kubernetes dashboard

3. Manage your app lifecycle  
Keep your apps up to date with Kubernetes container orchestration tools.

Expose your app

Add storage to your app

Connect integrations

Install add-ons
