Collecting MarkupSafe>=2.0
  Downloading MarkupSafe-2.1.1.tar.gz (18 kB)
  Preparing metadata (setup.py) ... done
Installing collected packages: MarkupSafe, itsdangerous, colorama, Werkzeug, Jinja2, click, flask
  DEPRECATION: MarkupSafe is being installed using the legacy 'setup.py install' method, because it does
  not have a 'pyproject.toml' and the 'wheel' package is not installed. pip 23.1 will enforce this behaviou
  r change. A possible replacement is to enable the '--use-pep517' option. Discussion can be found at https
  ://github.com/pypa/pip/issues/8559
  Running setup.py install for MarkupSafe ... done
